Microsoft Windows LTSC Relicensing Option for Trimble TSC7 and Trimble T7 - March 2025 Update

Overview

Trimble provides the most secure data collectors in the market. Trimble provides required, regular OS updates to stay on top of security threats. Navigating these security support/requirements requires close collaboration with Trimble's internal and external hardware and software partners.

This product bulletin describes the status of the Microsoft Windows 10 Operating System and Security Updates for the Trimble TSC7 and Trimble T7 data collectors and an option to relicense devices to continue updates from Microsoft.

Affected products

Trimble TSC7, Trimble T7

Latest version of Windows available on new TSC7 and T7 data collectors

Trimble TSC7 and Trimble T7 have transitioned to *Windows 10 IoT Enterprise LTSC* (Long Term Service Channel) so that we can provide security updates through January 2032. This OS is functionally equivalent to the previously installed Windows 10 Pro or IoT Enterprise GAC OS versions.

Microsoft Windows 10 end of support October 2025

TSC7 and T7 products shipped previously with Windows 10 IOT Enterprise and Windows 10 Professional will see their windows update support stop in October 2025.

<http://surveypartners.trimble.com>

Trimble has shipped the following OS's on TSC7 and T7 previously

- Windows 10 Professional GAC (General Availability Channel) (up to version 22H2)
 - *(Trimble licensed TSC7 & T7 data collectors with this OS during October 2022 and prior)*
 - End of License Sales: October 31, 2022
 - Security Updates available through: October 14, 2025
- Windows 10 IoT Enterprise GAC (General Availability Channel) (version 22H2)
 - *(Trimble licensed TSC7 & T7 data collectors with this OS between October 2022-October 2023)*
 - End of License Sales: October 31, 2023
 - Security Updates available through: October 14, 2025
- Windows 10 IoT Enterprise LTSC 2021 (version 21H2)
 - *(Trimble started licensing new TSC7 & T7 data collectors with this OS in October 2023)*
 - Security Updates available through: January 13, 2032

Relicensing option for TSC7 and T7 data collectors shipped with non LTSC operating systems

Trimble will offer the ability to relicense TSC7 and T7 data collectors to *Windows 10 IoT Enterprise LTSC* to extend security updates beyond 2025. The process for relicensing will require an operating system reload, and can be done at a Trimble authorized dealer or by the end customer.

Trimble is targeting the roll out of this relicensing program in Q2 2025 well before the October 2025 date when Microsoft stops providing updates to non LTSC operating systems.

There will be a new Trimble part number and a small fee for a new license. Communications on the pricing will follow closer to the launch of this program.

A Trimble Dealer webinar in Q2 will provide additional details and training.

FAQs

Can Windows 11 be installed on a TSC7 or T7?

Windows 11 is not compatible with the TSC7 or T7 products. *Windows 10 IoT Enterprise LTSC* will be supported by Microsoft through 2032.

How do I identify which version of Microsoft Windows my data collector has?

- Tap on Start menu > Settings > About
- Under Windows specifications, check which edition and version of Windows your data collector is running

What about Trimble T100 or T10x tablets?

Trimble T100 and T10x tablets can run Windows 11, Windows 11 does not have an end of support date established at this time.

For more information contact your local Trimble sales representative.
